

Ergonomic Dental Treatment Without Nurse

This is a brainstorming project of the

SEO of

SANICUM

Jörg Vollstedt

Dentist since 1985

www.sanicum.de

The logo for SANICUM, featuring the word "SANICUM" in a bold, white, serif font, underlined with a thick white horizontal line, all set against a solid blue rectangular background.

SANICUM

Ergonomic Dental Treatment Without Nurse

Dental treatment without nurse ... if we can be consequent

1. Then dentist should be trained in ergonomical adapting his working position so that no excentric bodyposition lead to MSD (muscle sceletal disease)
2. The working area arround the operation field should be prepared so, that instruments, material, equipments are short handed distance.
3. Suction 1 and 2 should fixed at the treatment chair
4. Addition delivery plates should fixed at the treament chair
5. For garanteed free sight for the dentist a retractor should be insert into the mouth of the patient
